

Douglas Odell

Senior Frontend Engineer · React & TypeScript

+1 (508) 685-6041 · douglasio711@gmail.com · [linkedin.com/in/douglasio](https://www.linkedin.com/in/douglasio) · github.com/douglasio

SUMMARY

Senior frontend-leaning engineer with 10+ years of experience building complex, interactive web applications in React and TypeScript. Track record of owning full-stack features end-to-end, contributing to shared component libraries, and mentoring engineering teams. Comfortable in fast-paced SaaS environments with evolving requirements. Looking to contribute to teams building intuitive, performant, and scalable collaborative experiences.

TECHNICAL SKILLS

Core: React, TypeScript, JavaScript, Hooks, Component Architecture, Rendering Optimization, CSS3, HTML5

Backend: .NET Core, C#/.NET, Node.js, RESTful APIs, SQL, Postgres, Serverless functions

Platforms: AWS, Azure, Cloudflare, Contentful, Netlify, OpenText WMS, Algolia, Google Analytics

Patterns: Component architecture, hooks, state management, rendering optimization, mobile-first design

Testing: Unit (Jest), integration, and end-to-end testing strategies

Tooling: Figma, Gatsby, Storybook, Next.js, Git, Mulesoft

PROFESSIONAL EXPERIENCE

Commonwealth Financial Network | Waltham, MA → San Diego, CA | August 2019—Present Software Engineer

- Built and maintained **10+ full-stack web applications** for financial professionals using React, TypeScript, and JavaScript, with C#/.NET middleware and SQL, collaborating with PM, design, and backend teams to deliver features from ideation through launch.
- Architected a **35+ component React UI library** adopted across 10+ applications, improving consistency, accelerating development velocity, and shaping frontend standards across the org.
- Designed and implemented an **in-house secure site search system** (React + .NET Core + Postgres + AWS), reducing reliance on third-party vendors and cutting operational costs.
- Led the **migration of 185 legacy web forms** to React with REST API integrations, eliminating major tech debt and improving maintainability.
- Delivered **Jamstack migrations** for 3 public websites (Gatsby + GraphQL + Contentful + Netlify), improving performance and enabling non-technical content management.
- Integrated third-party systems (Google Analytics, SearchBlox, ServiceNow, Cvent) into a home-grown ecosystem to improve analytics, search, and content workflows.
- Served as repository code owner, conducting code reviews and driving engineering quality through change-management processes.

Commonwealth Financial Network | Waltham, MA | Aug 2016–Aug 2019 Manager, Web Development & UX

- Managed, mentored, hired, and technically supported a team of **5–10 engineers** across varying skill levels — experience aligned expectation that Senior Engineers mentor junior and mid-level teammates.
- Collaborated across functions as contributor, technical lead, and scrum master, bridging designers, PMs, and backend engineers.
- Improved the development support queue process, reducing manual administrative overhead by **25%**.

Commonwealth Financial Network | Waltham, MA | Aug 2013–Aug 2016 Front End Application Developer

- Supported and enhanced **10+ internal and external web applications**, contributing to UI development, content management, and iterative improvements.

Freelance | Remote | August 2013–Present

Web Designer & Developer

- Designed and built client websites using WordPress, Wix, and Squarespace; consulted on UX, design, and implementation for small business owners.
- Designed and developed custom wedding websites using NextJS, MantineUI, Hubspot integration, hosted on Cloudflare

EDUCATION & CERTIFICATIONS

B.S., Boston University | Boston, MA | 2009–2013

Certified ScrumMaster (CSM) · Certified Usability Analyst (CUA) · Dale Carnegie Program

AWS Certified Developer - Associate (in progress)
